

Tokistar's Color Mix System is for use with our LED fixtures operating at voltages from 8 to 24 VDC. With the Color Mix System, you have the ability to create any color by adjusting the brightness level of the 3-channels (Red/Green/Blue). These colors may be stored in one of the 10 memory locations. In the animation mode, the colors can be set in motion. You can flash, fade or cross fade between selected colors, or select our Demo Mode which is a dynamic combination of all three. The unit installs in a double-gang junction box.

### Specifications

1. Input: 8-24VDC
2. Dimensions: 4.50" x 4.75" x 1.65"
3. Weight: 200g / 0.45 lbs
4. Operating Temperature: 0-40°C
5. Standards: ETL LISTED to UL 2108 when used with Tokistar lighting products
